

ALI HAMZA GILL

LARAVEL / PHP WEB DEVELOPER | RESPONSIVE WEBSITES, MYSQL & API INTEGRATIONS

Pakistan | 0348 0227661 | juttputer802@gmail.com | Portfolio: paysavo.com

PROFESSIONAL SUMMARY

Laravel/PHP Web Developer with 4+ years of experience building production fintech, CRM, and ERP platforms, delivering responsive Laravel interfaces, REST APIs, and MySQL-driven systems used by real customers and operations teams. Currently lead backend delivery and API integration for a live fintech platform, coordinating 8+ third-party payment, KYC, and crypto integrations (Bridge, AquaNow, Flutterwave, Fireblocks, Persona, and others). Skilled at translating approved UI designs into clean, responsive Laravel screens, resolving production issues quickly, and shipping maintainable code across multiple concurrent projects. Strong remote communicator with a track record of promotion (Junior to Senior in under a year) and end-to-end ownership from requirements through release support.

TECHNICAL SKILLS

Backend Development: PHP 8.x, Laravel, custom PHP, OOP, SOLID principles, service/action architecture, authentication, authorization, validation

Frontend & Design-to-Code: Laravel Blade, HTML5, CSS3, JavaScript, jQuery, AJAX, responsive layouts, PSD/Figma/design-reference implementation, cross-browser troubleshooting

Database: MySQL, Eloquent ORM, schema design, migrations, indexing, joins, transactions, query optimization, pagination, data integrity

APIs & Integrations: RESTful APIs, JSON, webhooks, Postman, payment providers, KYC services, mobile APIs, CRM/ERP integrations, error handling

Web Environment: LAMP, Linux, Apache, Git/GitHub, PuTTY, FileZilla, deployment support, production debugging, CI/CD familiarity

Quality & Delivery: Clean structured code, reusable components, documentation, PHPUnit/feature testing, code review, Agile delivery, multi-project coordination

PROFESSIONAL EXPERIENCE

Paysavo — Software Engineer — Backend Team Lead & API Coordinator

Nov 2024 - Present

Global fintech platform providing wallets, transfers, bill payments, mobile top-ups, KYC, and crypto services.

- Lead backend development of Laravel/PHP web applications, REST APIs, and Blade-based admin and customer portals supporting live wallet, transfer, and payment operations.
- Integrate and maintain 8+ third-party APIs — including Bridge, AquaNow, Checkbook.io, Flutterwave, Paga, Apaylo, Reloadly, Fireblocks, and Persona — with validation, error normalization, retries, and operational status handling.
- Build reusable components for deposits, withdrawals, transfers, bill payments, mobile top-ups, gift cards, KYC, crypto exchange, and multi-currency wallet operations, cutting duplicate development effort across modules.
- Optimize MySQL and Eloquent performance through indexing, query review, eager loading, and transaction-safe migrations, reducing slow-query incidents on high-traffic admin and customer screens.
- Resolve responsive-layout, authentication, and transaction-state issues in production, maintaining consistent behavior across customer, admin, and operational modules.
- Coordinate delivery across frontend, product, compliance, operations, and external partner teams using Git-based workflows, code review, and sprint planning.

Cyber Gen — Software Engineer — Junior Backend Developer, promoted to Senior

Jun 2023 - Nov 2024

Technology company delivering web development, CRM, service management, automation, and AI-enabled business solutions.

- Delivered Laravel/PHP features for CRM, service management, reporting, and internal business platforms using MySQL, Blade, JavaScript, and jQuery.
- Built responsive forms, dashboards, and role-based workflows with AJAX-driven interactions for operational users.

- Completed the Service Management module end-to-end, improving process flow across connected teams, permissions, and reporting — a key factor in early promotion from Junior to Senior.
- Debugged PHP, database, API, and cross-module issues, implementing structured fixes that improved application stability.
- Managed concurrent change requests with technical and non-technical stakeholders, delivering organized, production-ready updates on schedule.

Einnovation Software Solutions — Software Engineer — Intern & Junior Backend Developer

Feb 2023 – Jul 2023

Custom software agency building websites, CRM/ERP systems, portals, and client-specific business platforms.

- Implemented real-time chat and API-backed communication features for admin, manager, subcontractor, and partner users.
- Converted redesigned portal layouts into functional Laravel/PHP modules while preserving business rules, access control, and data integrity.
- Refined backend and frontend functionality using PHP, Laravel, MySQL, Blade, and jQuery to improve flexibility and user experience.
- Supported client change requests, database migrations, API integration, and cross-module release verification.

Self-employed / Academic — Freelance PHP/Laravel Developer & Final-Year Project Work

Aug 2022 – Jan 2023

Freelance client work alongside final-year academic project development during BS Software Engineering.

- Built small-scale Laravel/PHP web applications for local freelance clients, including basic CRUD systems, admin panels, and contact/booking forms.
- Designed and developed final-year project using PHP, Laravel, and MySQL, applying database design, authentication, and responsive UI principles learned during coursework.
- Practiced core web development skills — Blade templating, RESTful routing, form validation, and MySQL schema design — in preparation for professional roles.

SELECTED WORK

- Paysavo — Production Fintech Platform: Laravel backend services, responsive operational portals, payment and KYC integrations, and production support for a live platform. (paysavo.com)
- AZS Petrol Station Management System (Turkmenistan): Secure, database-driven workflows, monitoring functionality, and role-based management features.
- Heme/Onc Question of the Day: API functionality and web workflows for a daily hematology and oncology engagement platform.
- Dasi Charades (Flutter Game): Mobile API integration and performance improvements for real-time interactions.

EDUCATION

Bachelor of Software Engineering — Lahore Garrison University, 2019 – 2023
